Summary

I am an economist specialized in quantitative analysis and data processing, with experience in statistical and computational methods and results visualization. I currently work as a quantitative analysis consultant, developing products in R and implementing analytical techniques for research projects.

Work Experience

Data Scientist — Evaluar SAS (04/2025 - Present)

I currently work on the formulation and evaluation of public projects and policies, leading the quantitative area and generating solid evidence to support our research and proposals.

Instructor in Quantitative Methods — Flacso México (09/2024 and 10/2025)

I am in charge of the workshops taught in the database management and text mining with natural language processing modules of the data science diploma program.

Research Internship — Ecopetrol (08/2023)

I completed my master's internship at the Colombian Petroleum Company. I prepared a report on energy policy for the incorporation of renewable energy sources into the Colombian electricity system, with an emphasis on geothermal energy as a potential area for the company's diversification.

Internal Control Analyst — Molino Cañuelas (04/2021 - 07/2022)

Molino Cañuelas is an Argentine agri-food company; my work as an analyst involved reconciling internal information from each plant in terms of inputs and finished products. I managed information from the different stages of the production process, based on which I generated reports and control dashboards to implement improvement plans within the company.

Adjunct Professor — Universidad Nacional de Río Cuarto (04/2021 - 07/2021)

I participated in the International Economics course (3rd year of the economics degree) at Universidad Nacional de Río Cuarto as a teaching assistant coordinator.
